

About QUODD's Data Feed Technology

QUODD's Data Feed technology is built on a scalable system that aggregates, manages, and streams market data from the major North American stock exchanges and other content sources to power all of our applications with the highest quality data in the industry.

The same technology that powers our QUODD *Equity+* professional market data workstation is available in the form of low latency streaming data feeds covering all major North American Exchanges. With QUODD's Data Feed technology, clients have access to the fastest, most reliable financial market data for use in their own proprietary applications and third party software.

QUODD'S DATA FEED SOLUTIONS OFFER UNPARALLELED SPEED, QUALITY, RELIABILITY, FLEXIBILITY, COVERAGE, AND SERVICE:

SPEED, QUALITY AND RELIABILITY

Low latency, complete redundancy, and superior accuracy and reliability.

FLEXIBLE DELIVERY OPTIONS

Receive the data you need in the manner that works best for you.

SUPPLEMENTAL DATA

Fundamental, historical, and analytical data keyed to the same symbology.

EASE OF USE

User-friendly format ensures that our feeds and API are easy to implement and manage.

SUBSTANTIAL COST SAVINGS

QUODD will guarantee a Substantial Cost Savings over your current vendor.
